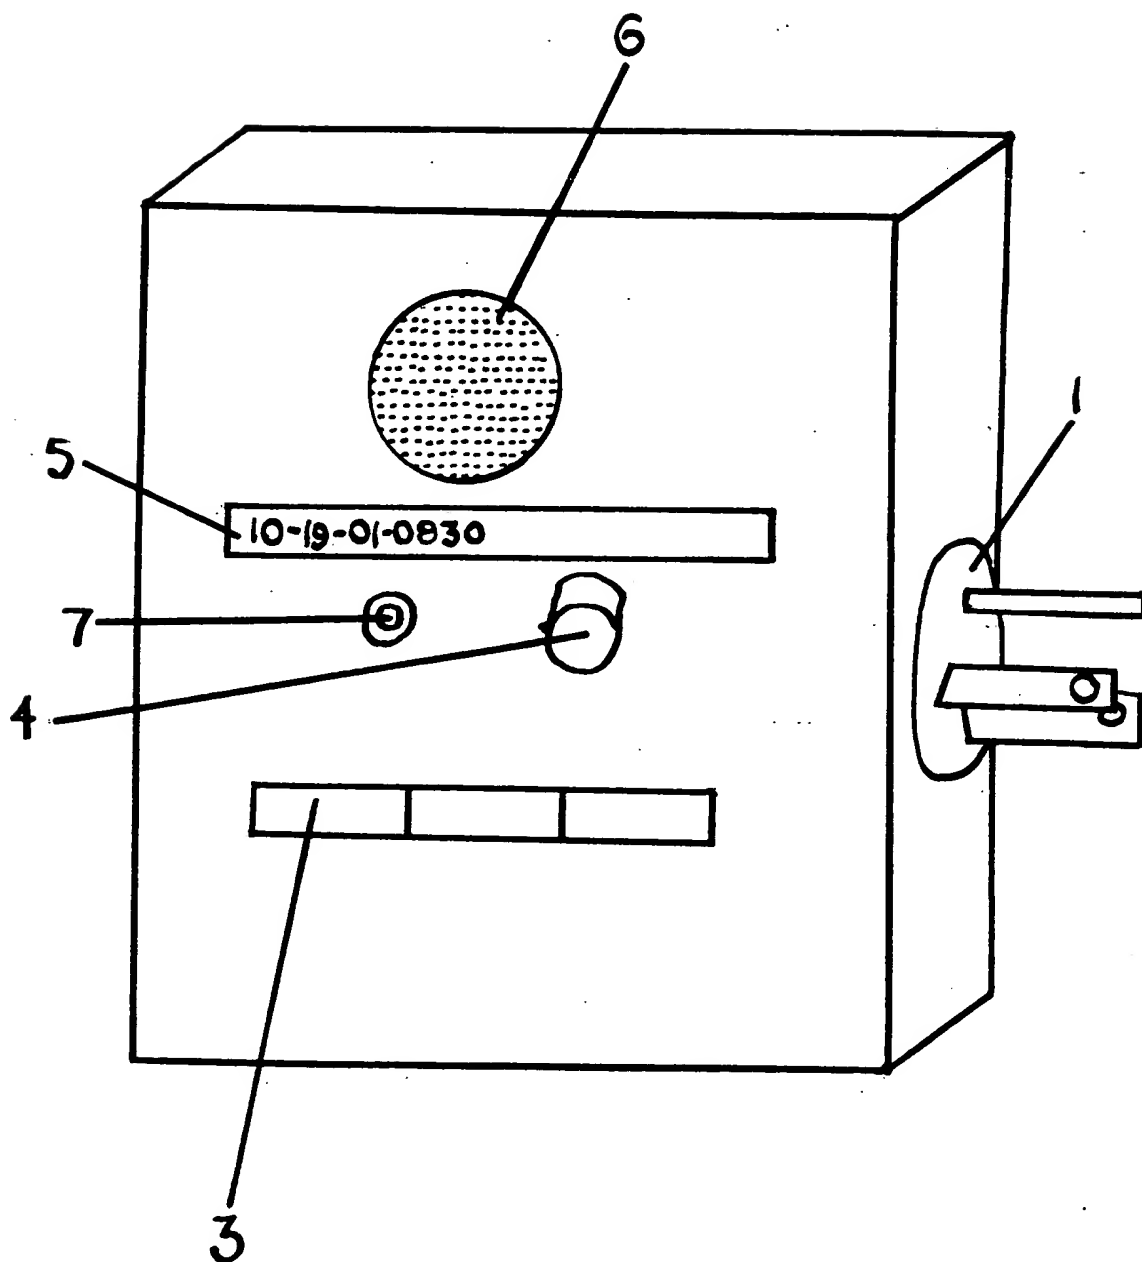

FIG. 1

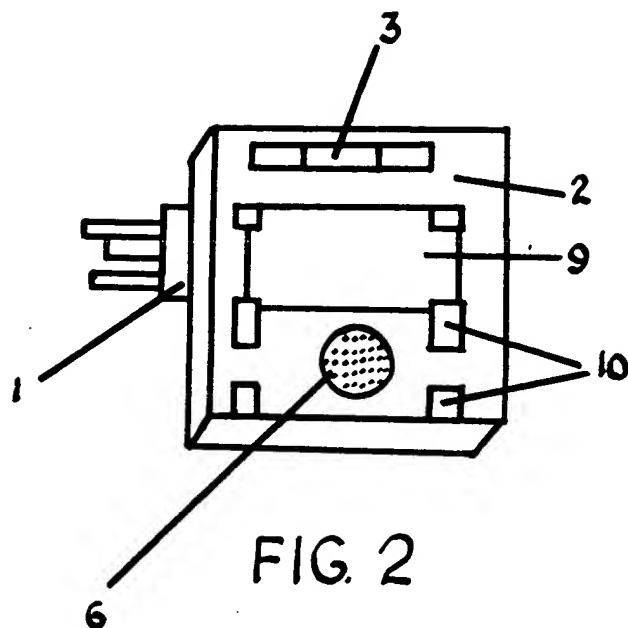

FIG. 2

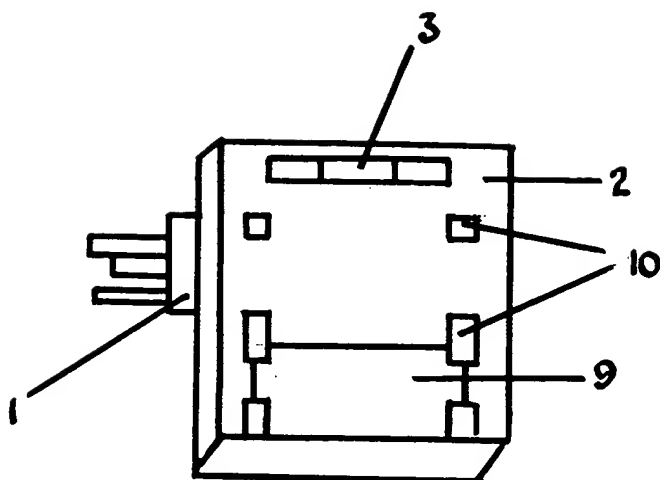

FIG. 3

A line drawing of a digital watch face. At the top is a long, thin rectangular feature labeled '12' at its right end. Below this is a large rectangular display area showing the time '8:11'. To the left of the display is a small circle, and to the right is a small square. The entire watch face is enclosed in a rounded rectangular border. Numbered callouts are as follows: '1' points to the top edge of the watch case; '2' points to the left edge; '3' points to the right edge; '4' points to the bottom edge; '5' points to the digital display; '6' points to the small circle on the left; and '7' points to the small square on the right.

A schematic diagram of a device. It features a central rectangular block labeled '2'. To the left of block '2', there is a smaller rectangular component with three horizontal lines extending from its left side, labeled '1'. Above block '2', there is a small rectangular component labeled '12' connected to the top of block '2' by a curved line.
